Global Innovations. Delivered Locally.™

Capture All the Benefits of Responder® 5

Now you can improve critical communications and link all of your systems to deliver even better, more integrated patient care. Choose the best path to meet your needs and gain the benefits and performance of Responder® 5, along with significant savings.

Everything we do begins and ends with patient care.

Patient Satisfaction

Responder 5 helps put the patient in control, allowing clear conversations between the patient and the caregiver – from specific patient requests to general reassurance that the caregiver is just a button press away.

- Fast communications with needs known immediately
- Reduced noise, benefiting patients and staff
- Intelligent escalations help improve patient satisfaction and rising scores
- No need for middleware

Improved Flow & Throughput

Responder 5 solutions yield improved responsiveness to patients from the entire care team, and across hospital departments.

- Increase efficiencies and effectiveness in delivering patient care
- Bridge the communications gap between departments and staff
- Improve workflows, increase bed turns and manage procedure throughput

Staff Satisfaction

Responder is a hospital-wide, critical communications solution that improves staff efficiency and reduces steps and stress in each caregiver's day.

- Improves direct staff-to-staff communication
- Simplifies routines and synchronizes assignments
- Reduces overhead paging
- Makes real-time data on patient status readily available

Ongoing Support

Rauland ongoing 24/7 support is unparalleled, with standards across our network that ensure installations are uniform and successful.

- Delivery of local service and training
- Collaboration at every stage of a project implementation: from evaluation and goal definition to identification of technologies, implementation, and support

Global Innovations. Delivered Locally.™

The benefits are significant.

Patient Safety

Direct two-way communication from the EMR to the Responder system communicates patient status and information immediately to the point of care – so that all caregivers know the patient status in real time.

- Corridor lights display real-time status
- Levels of alerts are differentiated
- Rounding reminders keep patient front and center
- Audio bath stations permit direct voice communication

Integrated Technologies

You are making a sizeable investment in a system that is often expected to last 10 years or more.

- Scale as needed, when needed, and grow to any size you reach
- Low cost of ownership
- Robust integration capabilities across your systems

Regulatory & Emergency Preparedness

Responder's critical communications solution, with phone and RTLS integrations, can immediately identify who has contact, where and for how long.

- Deliver unprecedented data to the hospital staff and state agencies
- Enhance overall communication and improve response times
- Foster accountability

Leveraged Investments

Responder 5 solutions embrace evolving and best of breed developments.

- Provide a choice of technologies and integrations
- Suit your environment and ongoing developments
- Upgrade pathways, software releases and integrations to mitigate any risk of obsolescence

Responder helps you deliver the highest quality patient care.

Global innovations. Delivered locally.

Rauland is the innovative leader in critical healthcare communication solutions globally, providing exceptional local oversight to ensure seamless deployment and flawless operation of your system. Our global footprint provides a broad perspective on a wide range of needs and challenges, helping us develop the most responsive, leading-edge technologies in the marketplace. That, coupled with our extensive local network and dedicated support teams, makes Rauland the definitive choice here, there and everywhere.

Experience the difference.

Visit Rauland's 40,000 sq. ft. Solution Center near Chicago to get hands-on with the benefits of Responder 5. See fully-integrated workflow solutions in simulated clinical environments, and 'drive' the upgraded system with real-time data.

Rauland has installed Responder's critical healthcare communications in more than 4,000 acute care hospitals in more than 40 countries.
