

Solutions for Nursing Facilities

5000

Responder®

5000

The Responder® 5000 nurse call communication solution can help you:

- Make a positive impact on the life of every resident and colleague
- Improve staff retention
- Boost productivity
- Improve workload management using better information management

**Responder solutions are proven around the world.**

- Strengthen your reputation
- Provide reassurance to residents and families

# How your facility becomes a community

## What does each member of the care team in your facility really need?

Residents want to feel safe and secure, and cared for with dignity.

Nursing staff want to keep their residents comfortable and safe from falls with efficient, compassionate care.

Families want to feel confident in the decision they've made, knowing their loved one will be well cared for and safe.

Administrators need to balance economic priorities with the ability to provide safe, effective care in a competitive marketplace.

**At the heart of these needs is one simple, shared, human need: the need to be heard.**

## RESPONDER 5000 KEEPS COMMUNICATIONS AND INFORMATION FLOWING, HELPING YOUR FACILITY BECOME A TRUE COMMUNITY OF CARE.

### QUALITY OF LIFE

- Greater staff satisfaction means lower turnover, improved continuity for residents
- Creates a healing environment that reassures residents their needs are being met
- Reduces noise from alarms, promoting a better sleep environment

### ENGAGED FAMILY

- Strengthens family engagement for better resident satisfaction
- Allows family to make direct requests to appropriate staff, rather than interrupt nurse
- Reassures families with continuous tracking of resident location for safety and security

### CULTURE OF SAFETY

- Visually identifies residents at risk of falls via multiple displays
- Balances privacy and safety, with 2-way communication from resident's bed and toilet

### ENVIRONMENT OF CARE

- Enables compliance with quality-over-quantity Medicare VBP programs
- Improves interdepartmental integration, including Housekeeping, EVS, Transport
- Reveals over-burdened staff situations for rapid mitigation

## FOCUS ON PREVENTION

- Monitors and trends critical activities for continuous improvement to avoid readmissions
- Continuous flow of data helps you prevent pressure ulcers, manage control of infectious residents
- Helps prevent wandering-related injuries and associated liabilities

## LOCAL SERVICE / SUPPORT

- Timely, onsite delivery of clinical design, implementation and application services and support
- Responder training is continually refreshed based on our field experience and ongoing R&D enhancements
- We'll get your staff up to speed quickly and successfully

## INTEGRATIONS

Rauland has worked closely with providers of Wander Management systems to ensure easy, seamless integration between these dedicated systems and the Responder 5000 architecture. This creates a more secure, comprehensive wandering prevention system, allowing your facility to receive optimal value while reducing redundancies.

## SOFTWARE

The Responder 5000 Software Application provides a robust, and uncomplicated solution for your communication needs, with activity boards, messaging app, reports and resident management.

### 1 Messaging

Responder 5000 provides messaging with a clear communication line from the resident to the caregiver. The system is designed for either visual/tone or voice communication.

### 2 Bathroom Station

Audio pullcord in resident's bathroom allows resident to communicate routine requests or distress verbally, directly to caregiver, to help avoid falls.

### 3 Room Station

Communicate directly with your residents to hear their needs, eliminating unnecessary trips to their room while maximizing your time.

### 4 Equipment Station

Medical equipment and device alarms connect directly from the resident's room to Responder 5000, notifying the appropriate nursing staff of the alarm status.

### 5 Workflow Station

Initiate new workflows with the push of a button, notifying key personnel of a task or room status that requires their attention.

### 6 Room Sconce

Programmable colors and flash rates provide a wide range of indications for alarms, staff registrations, and room status.
