

IS-WB Wall Mount Boxes

Stainless Steel Emergency & Assistance Wall Mount Boxes

DESCRIPTION:

The Stainless Steel Wall mount box provides an easy-to-see heavy duty enclosure for the IX Series and IS Series call stations, used for Emergency and Assistance applications. Installed in parking garages, airports, campuses, malls, and a wide variety of locales, these stations provide proper signage and specifications to meet ADA requirements. The beacon is always lit for easy visibility; strobe flashes during an emergency call-in.

ADA (28 CFR Part 36 section 4.4.1) states that an object must not protrude more than 4" if mounted higher than 27". Since these units have the potential to include a camera, mounting height restrictions are avoided with this streamline design, while call button mounting height guidelines can still be met.

Compatible sub stations include: IX-DF-2RA, IX-SS-2RA, IX-SS-RA, IS-DVF-2RA, IS-SS-2RA, IS-SS-RA, IS-SS-CI. Signage and strobe cover configuration is selectable by the customer.

FEATURES:

- Made of 12 gauge stainless steel
- Beacon/Strobe light on top
 - option for cage or full enclosure
 - Beacon stays lit in standby mode
 - Beacon flashes when call is placed
- Signage on sides available in either **EMERGENCY** or **ASSISTANCE**
- ADA Compliant: 4" depth to meet ADA requirements to allow mounting higher than 27", and proper signage and call button mounting height

MODELS:

- IS-WBCA:** Cage with Assistance lettering
- IS-WBCE:** Cage with Emergency lettering
- IS-WBHA:** Hood with Assistance lettering
- IS-WBHE:** Hood with Emergency lettering
